

NIO
Cloud

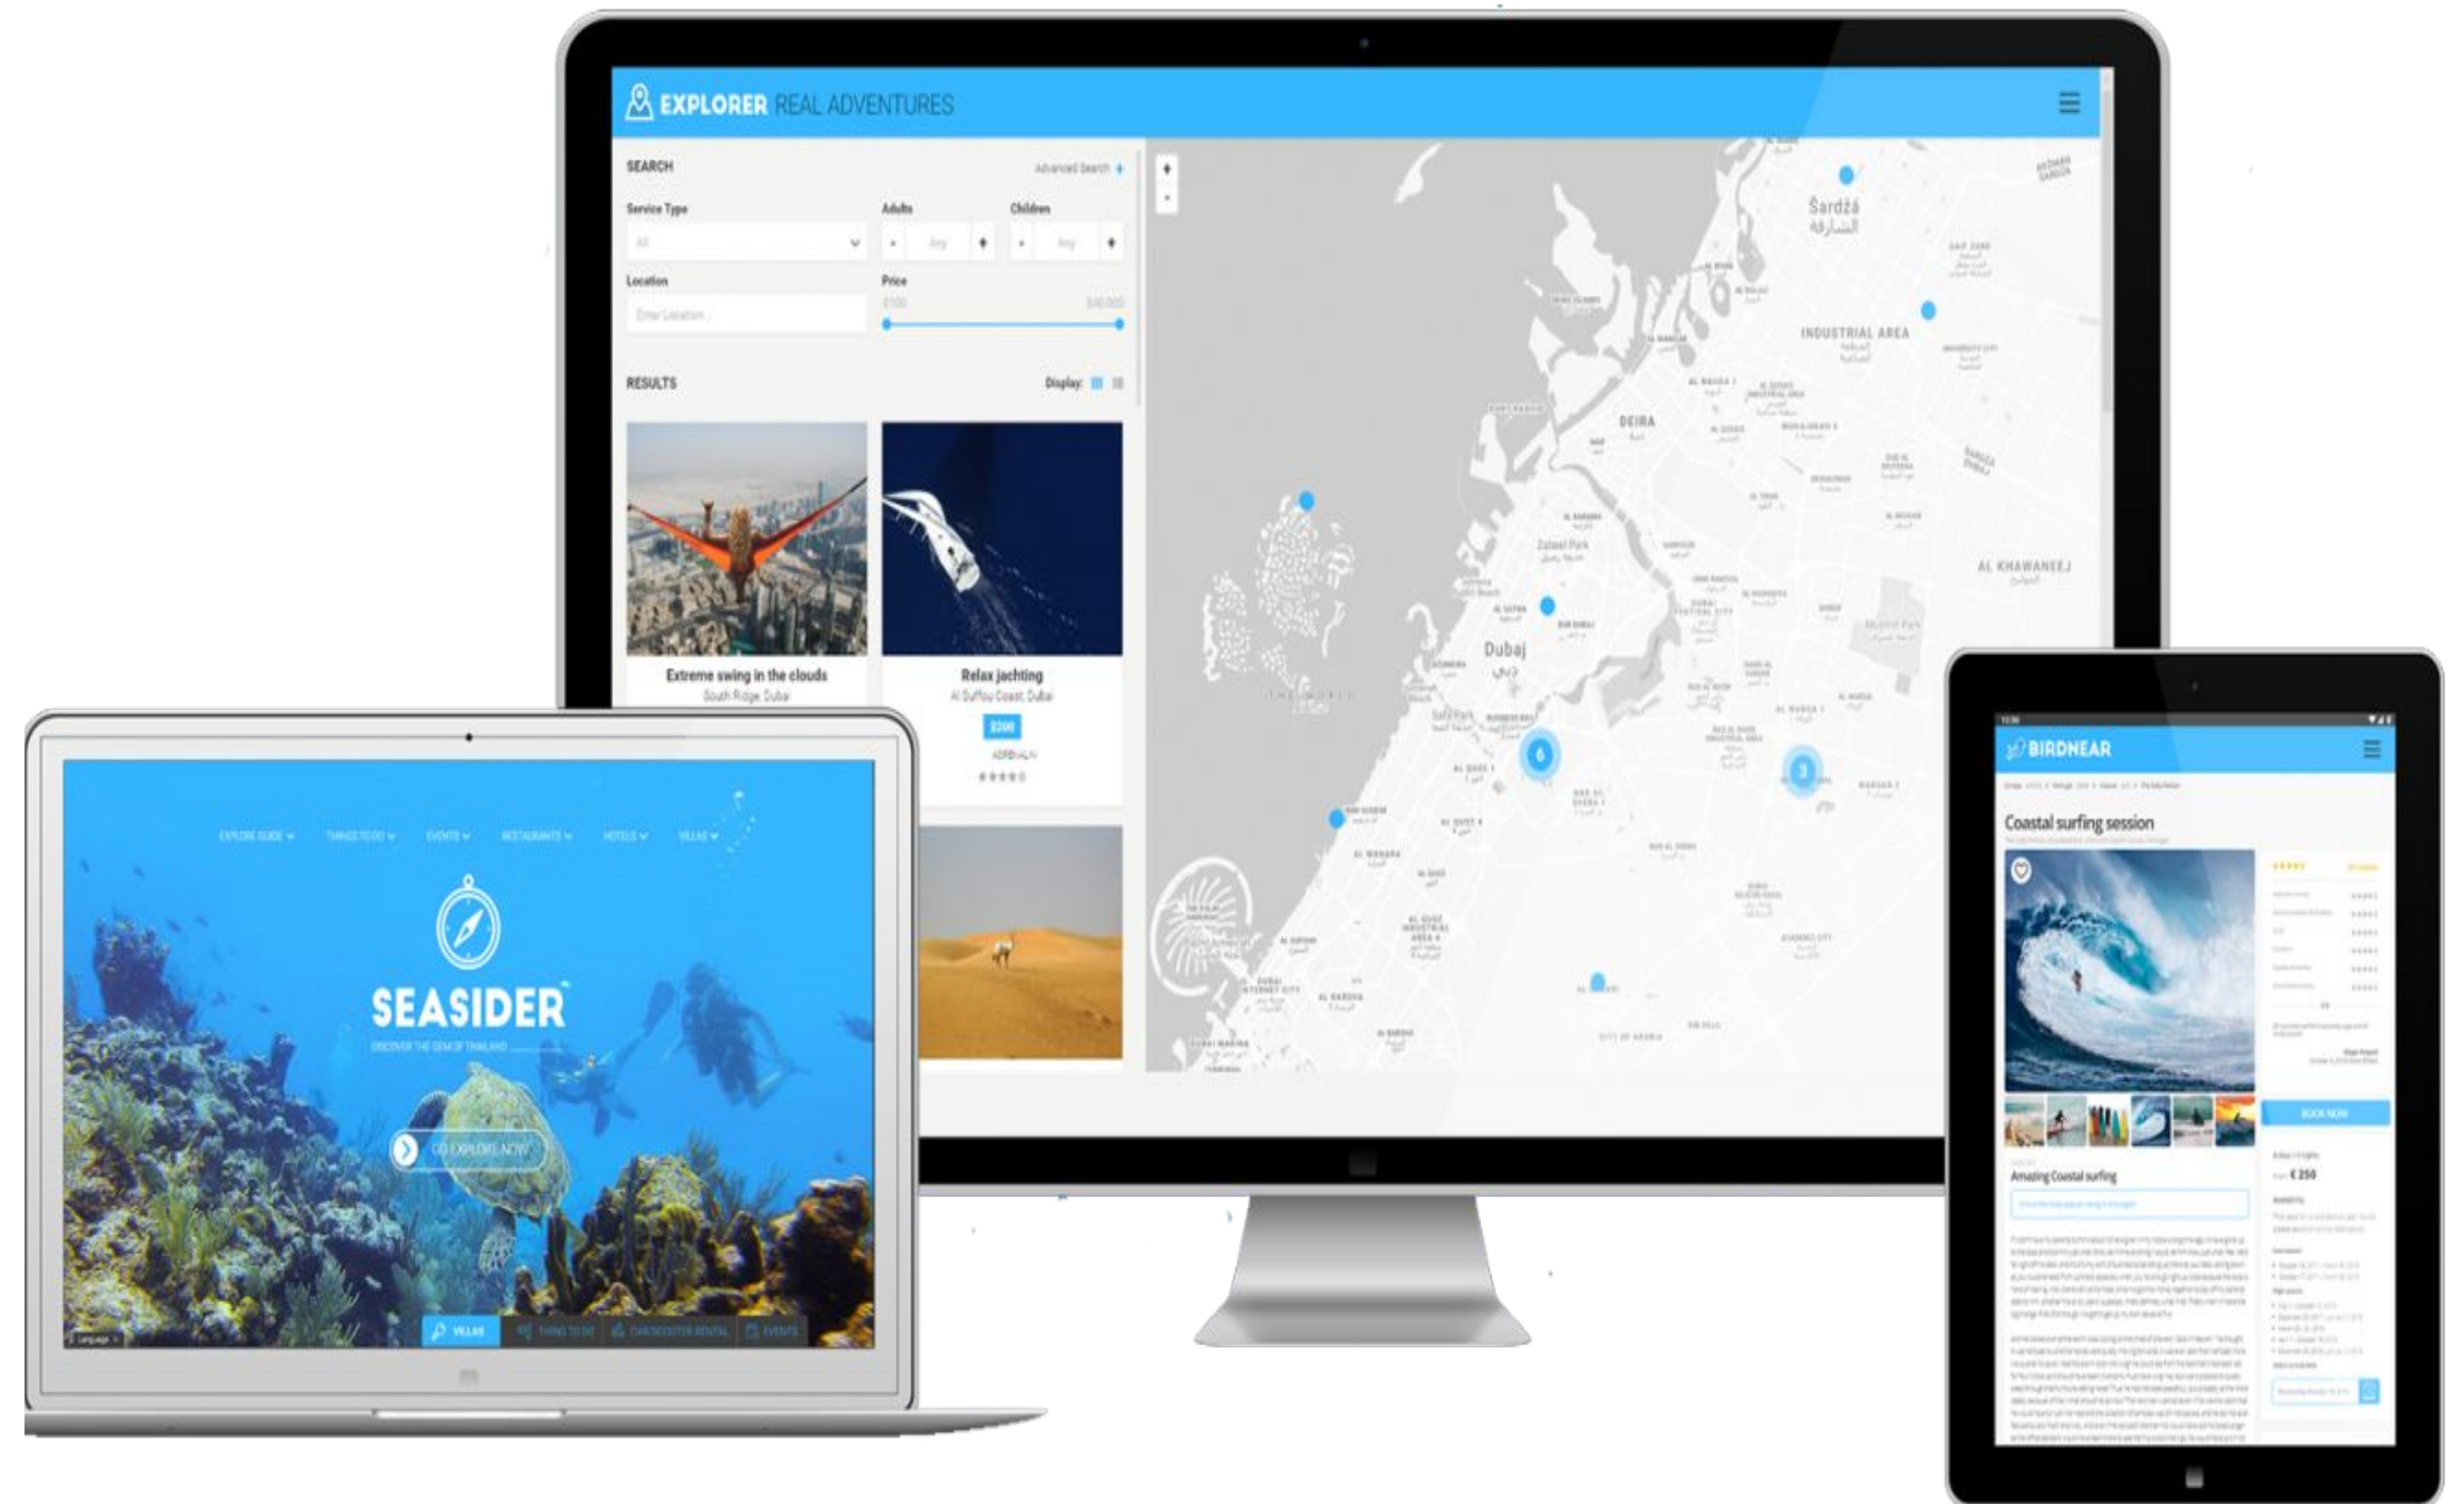

Cloud platform **BOHRIS.CLOUD**

Bohris.cloud replaces manual processes and enables uniform documentation and visualization of the main components of the well in the form of pipelines and assembly schemes. In order to monitor and evaluate the integrity, safety, and reliability of the entire well inventory, well operators usually still use manual, very time-consuming drawing and documentation processes.

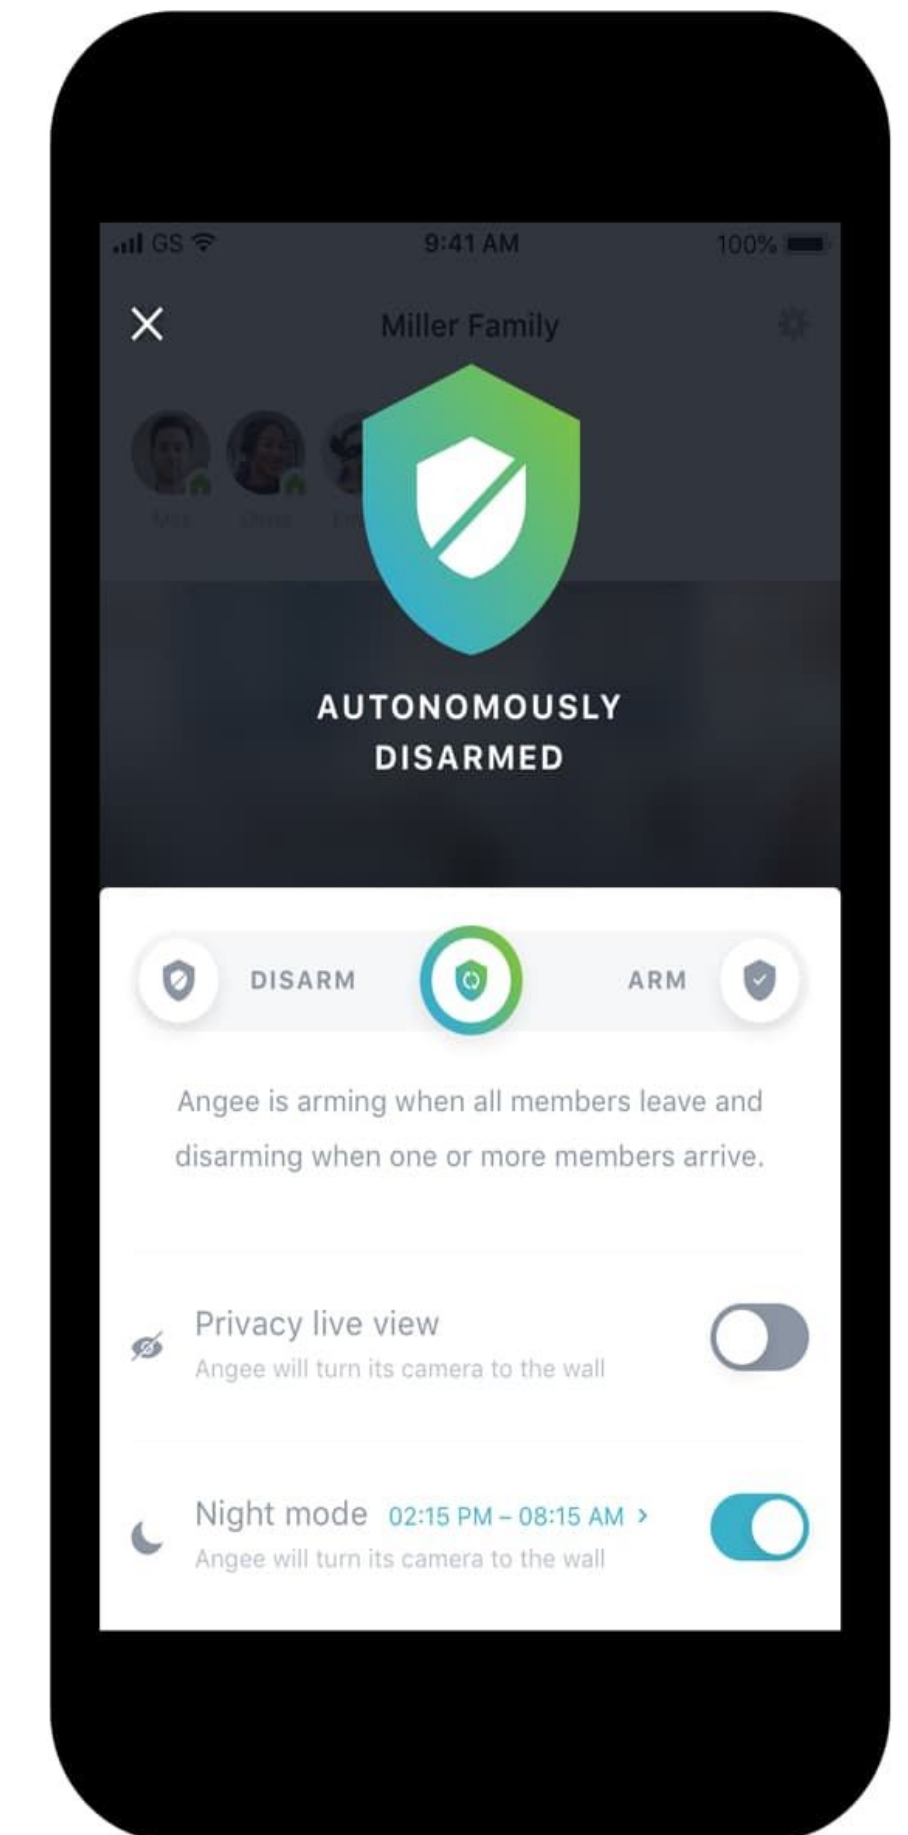

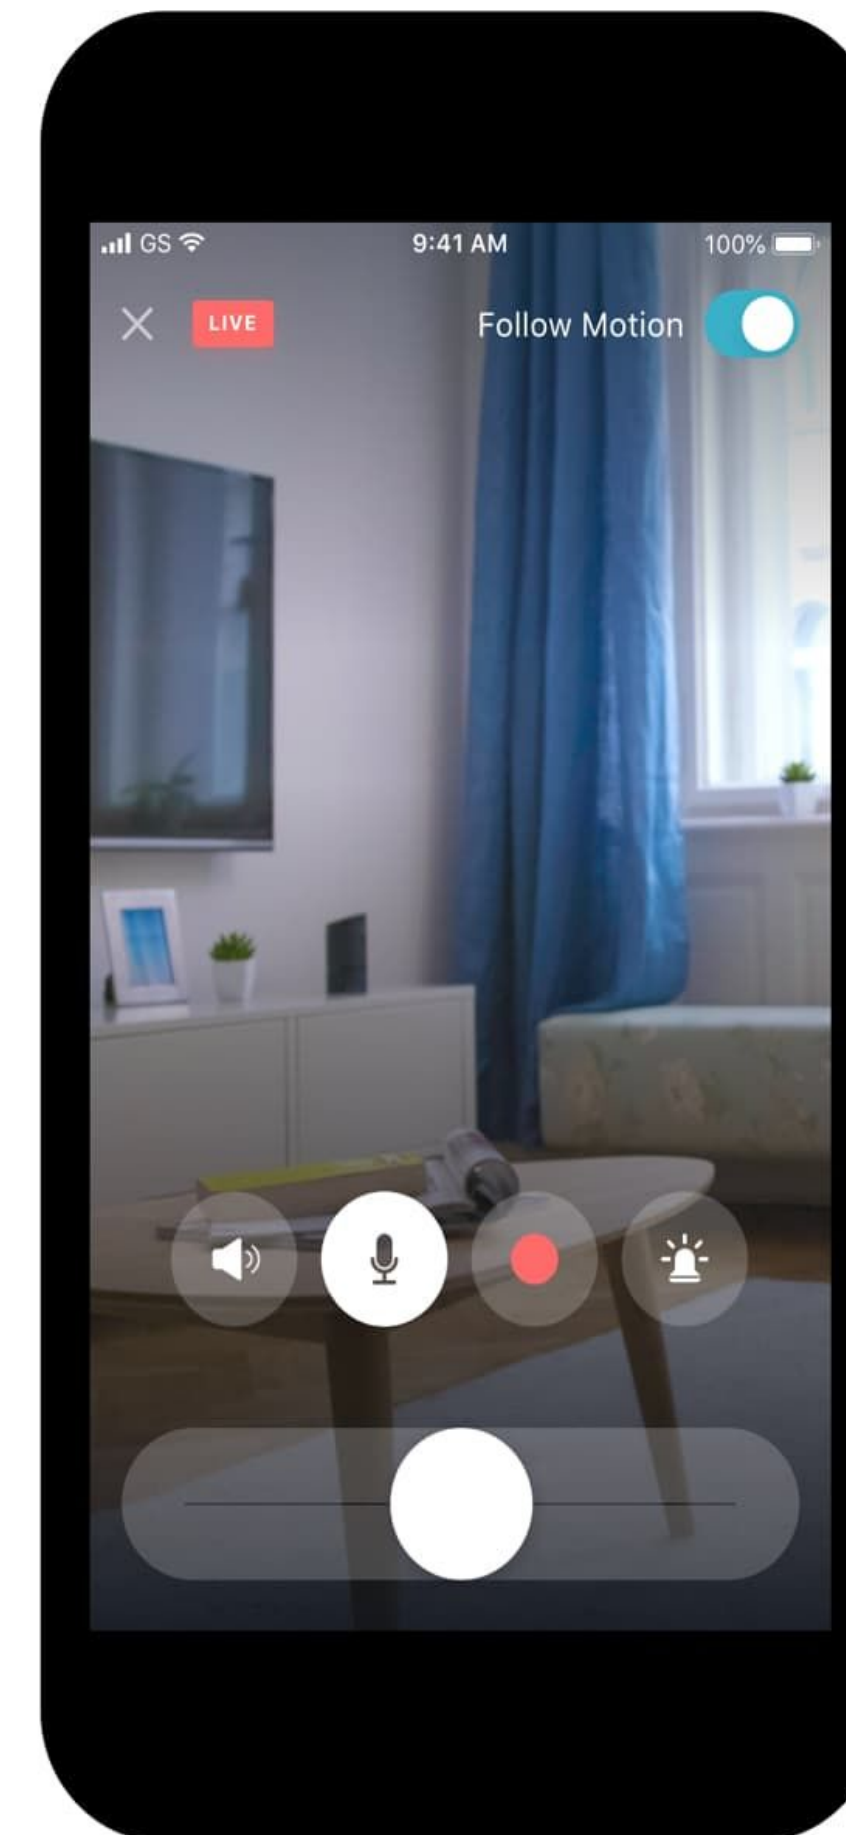

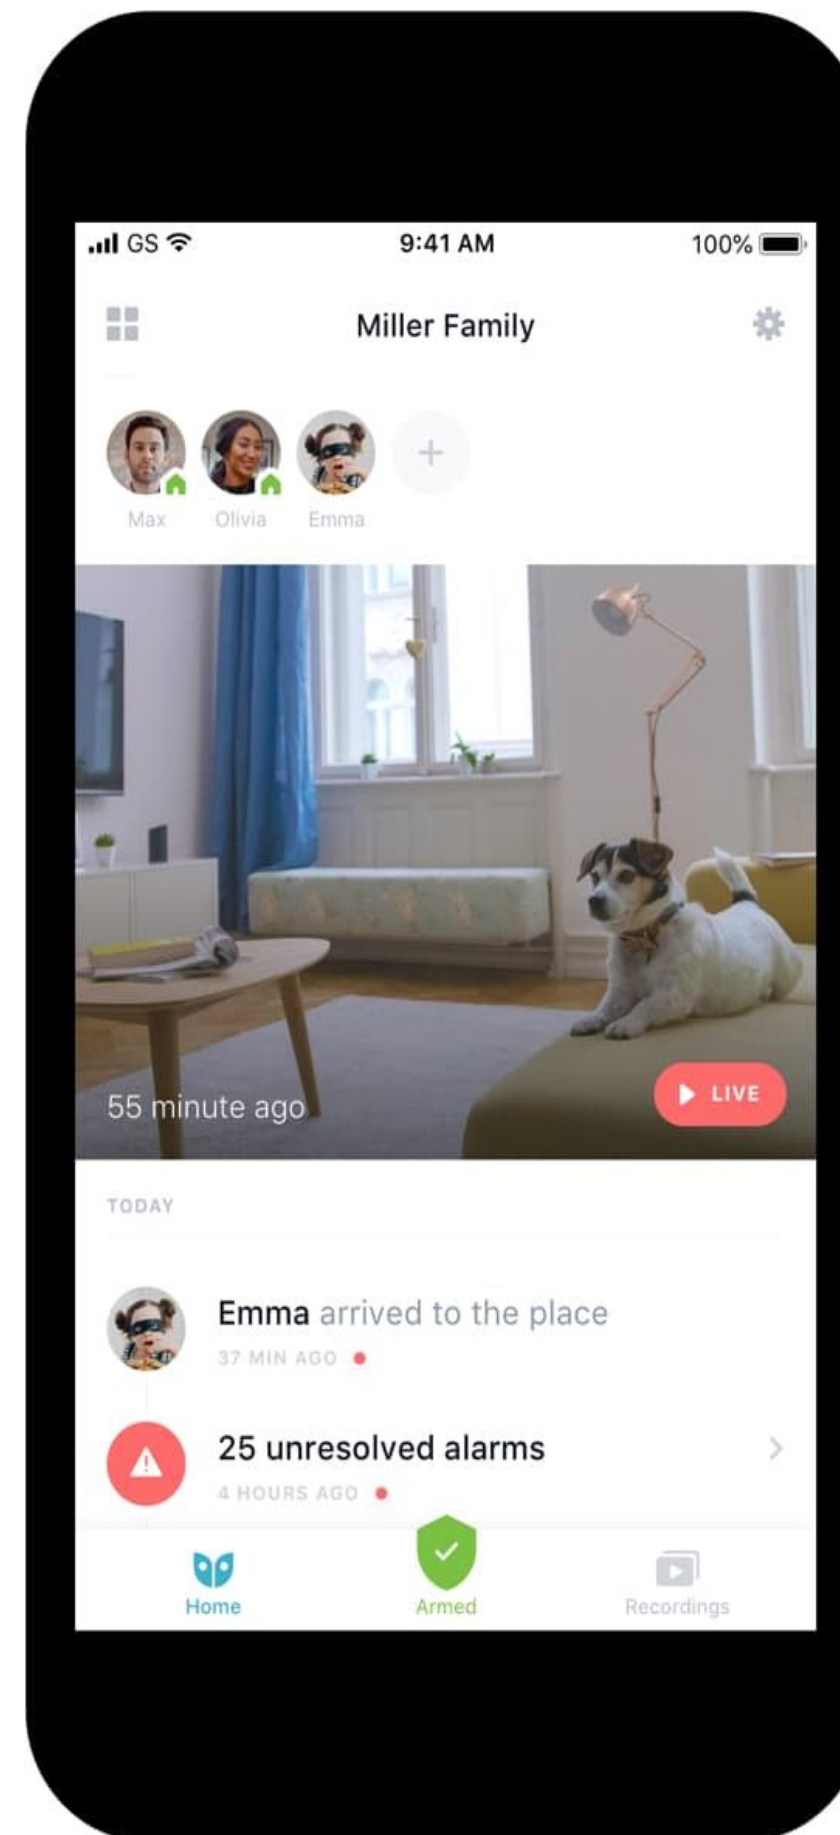

Reservation portal **SIESTA CLOUD**

Siesta Cloud is a multifunctional platform for business in the travel industry. The main added value of the platform is easy management of travel services, such as accommodation, transport, experiences and events. The second added value is the possibility to create travel portals without the need for any software development, on these you can offer your own services or 3rd party services to your customers.

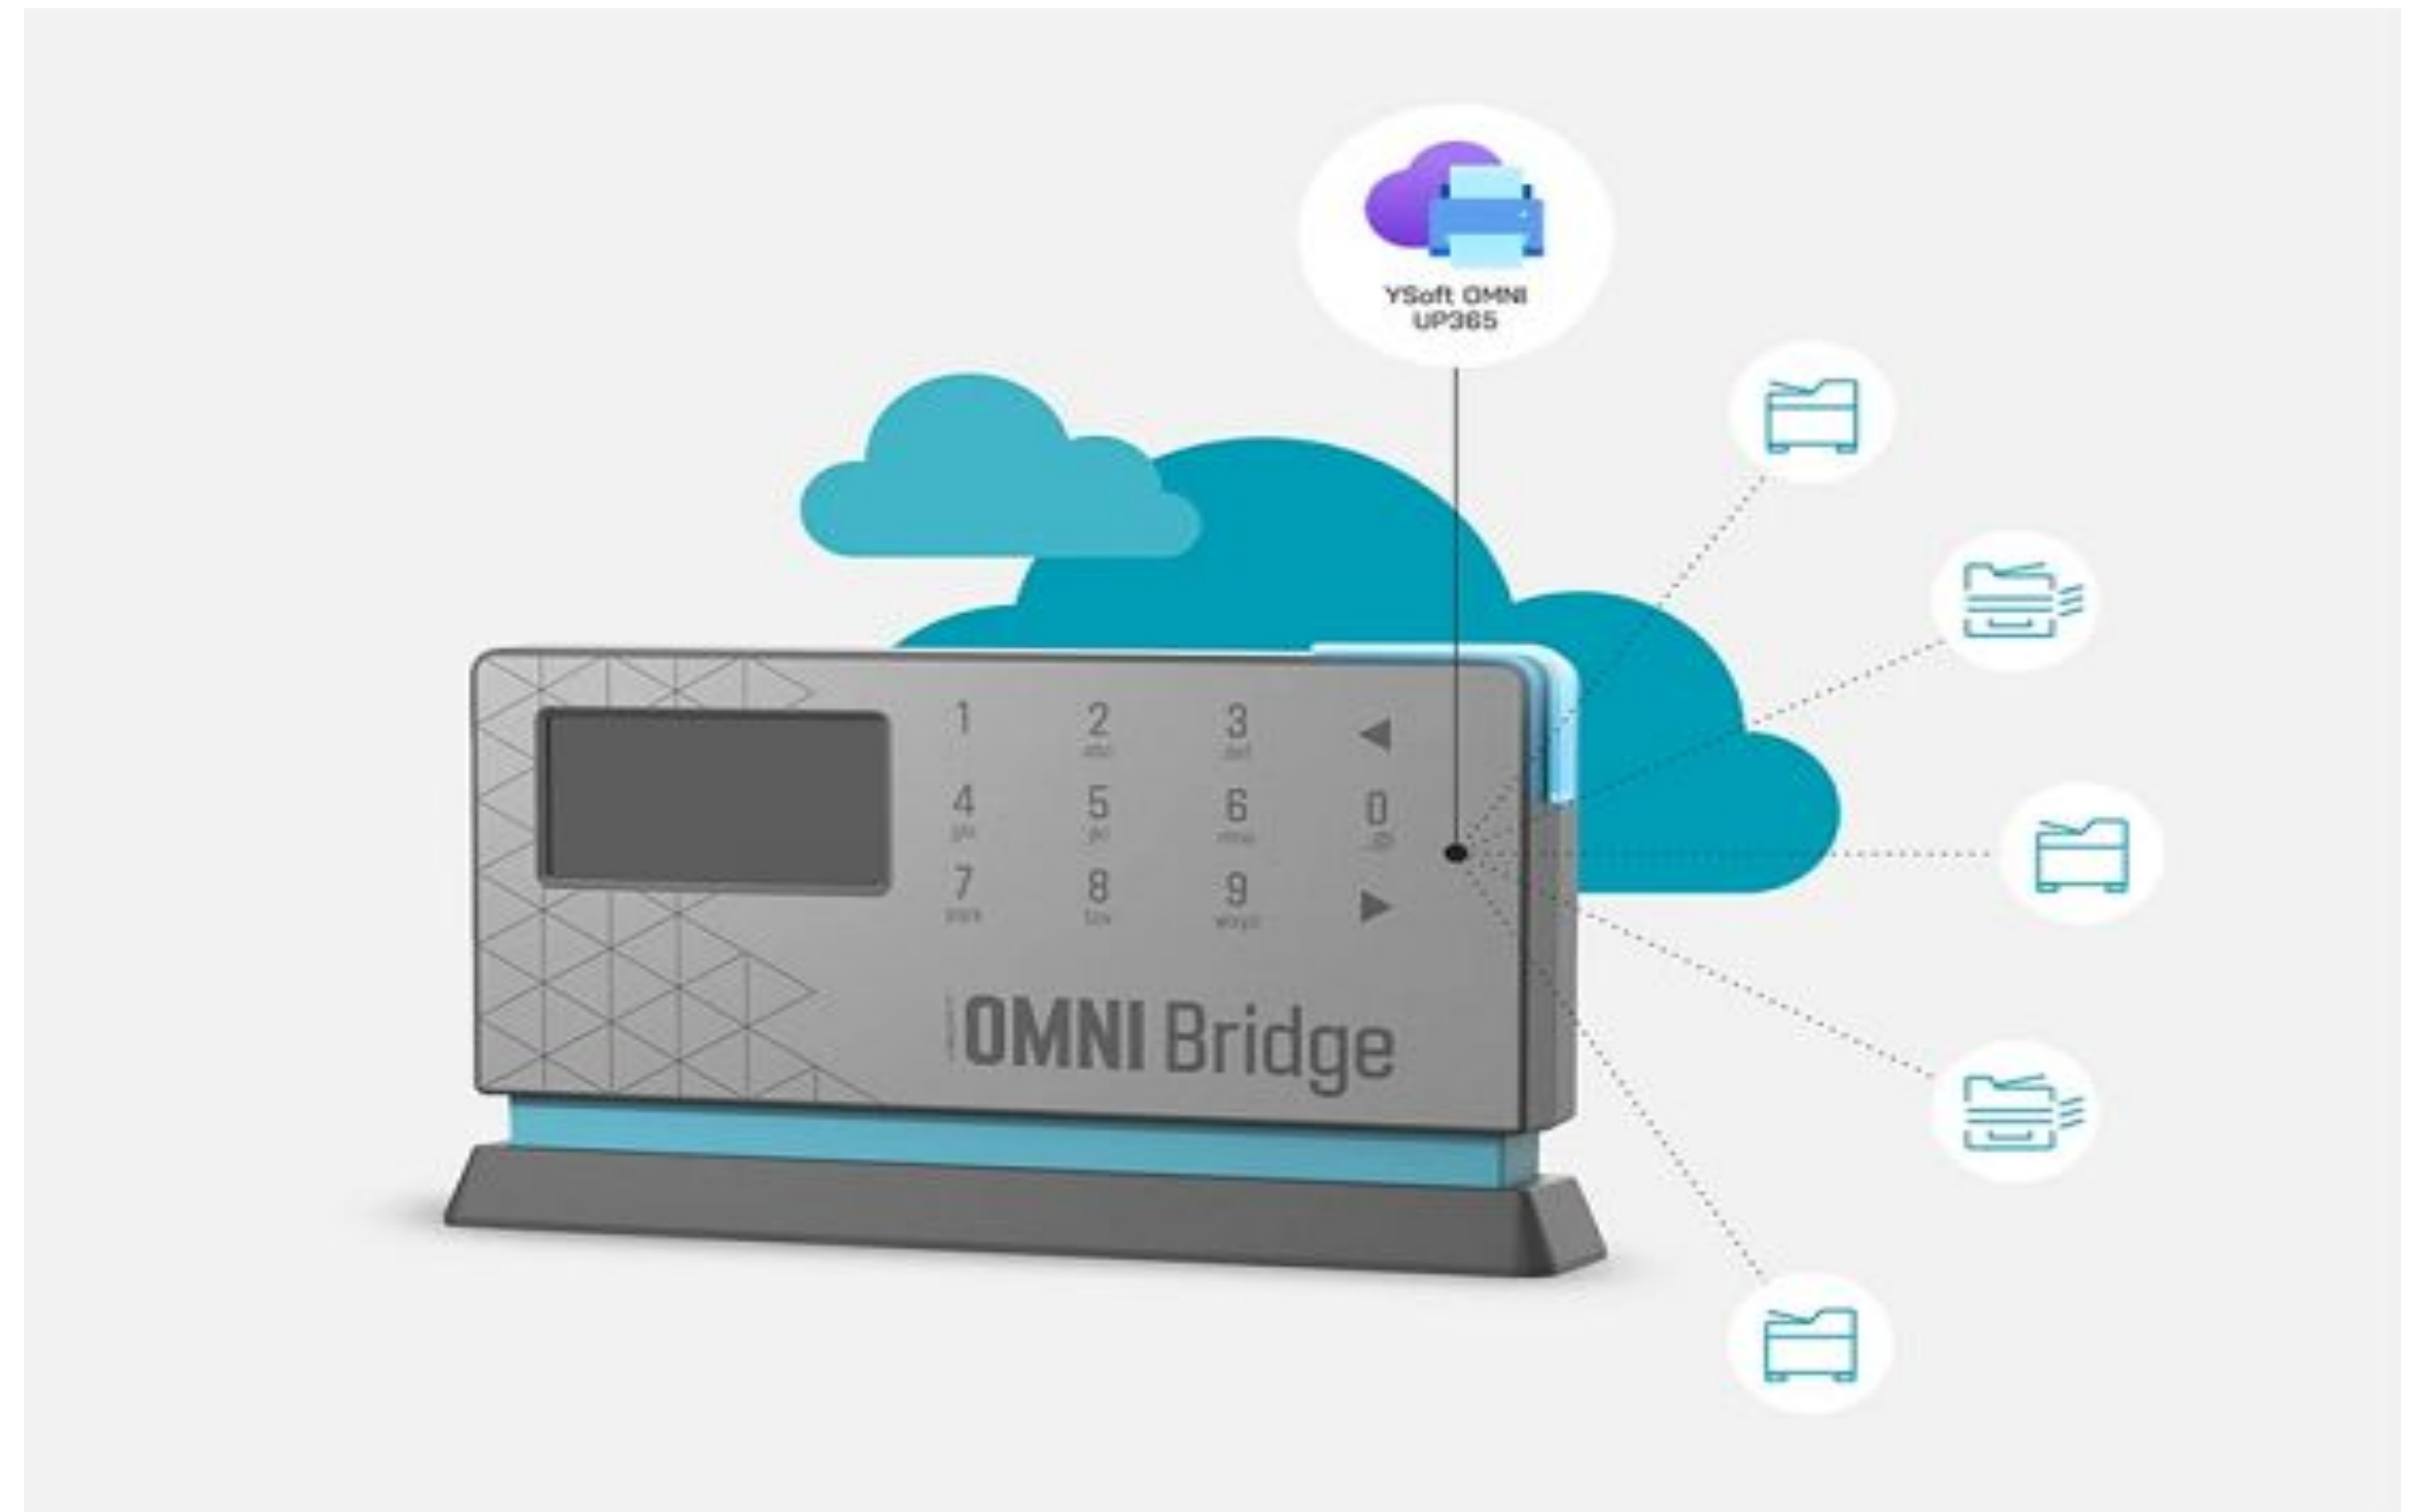

Security system **ANGEE**

Angee is a smart home security system, delivered to you as a cloud managed service, changing the way people protect and connect to their homes.

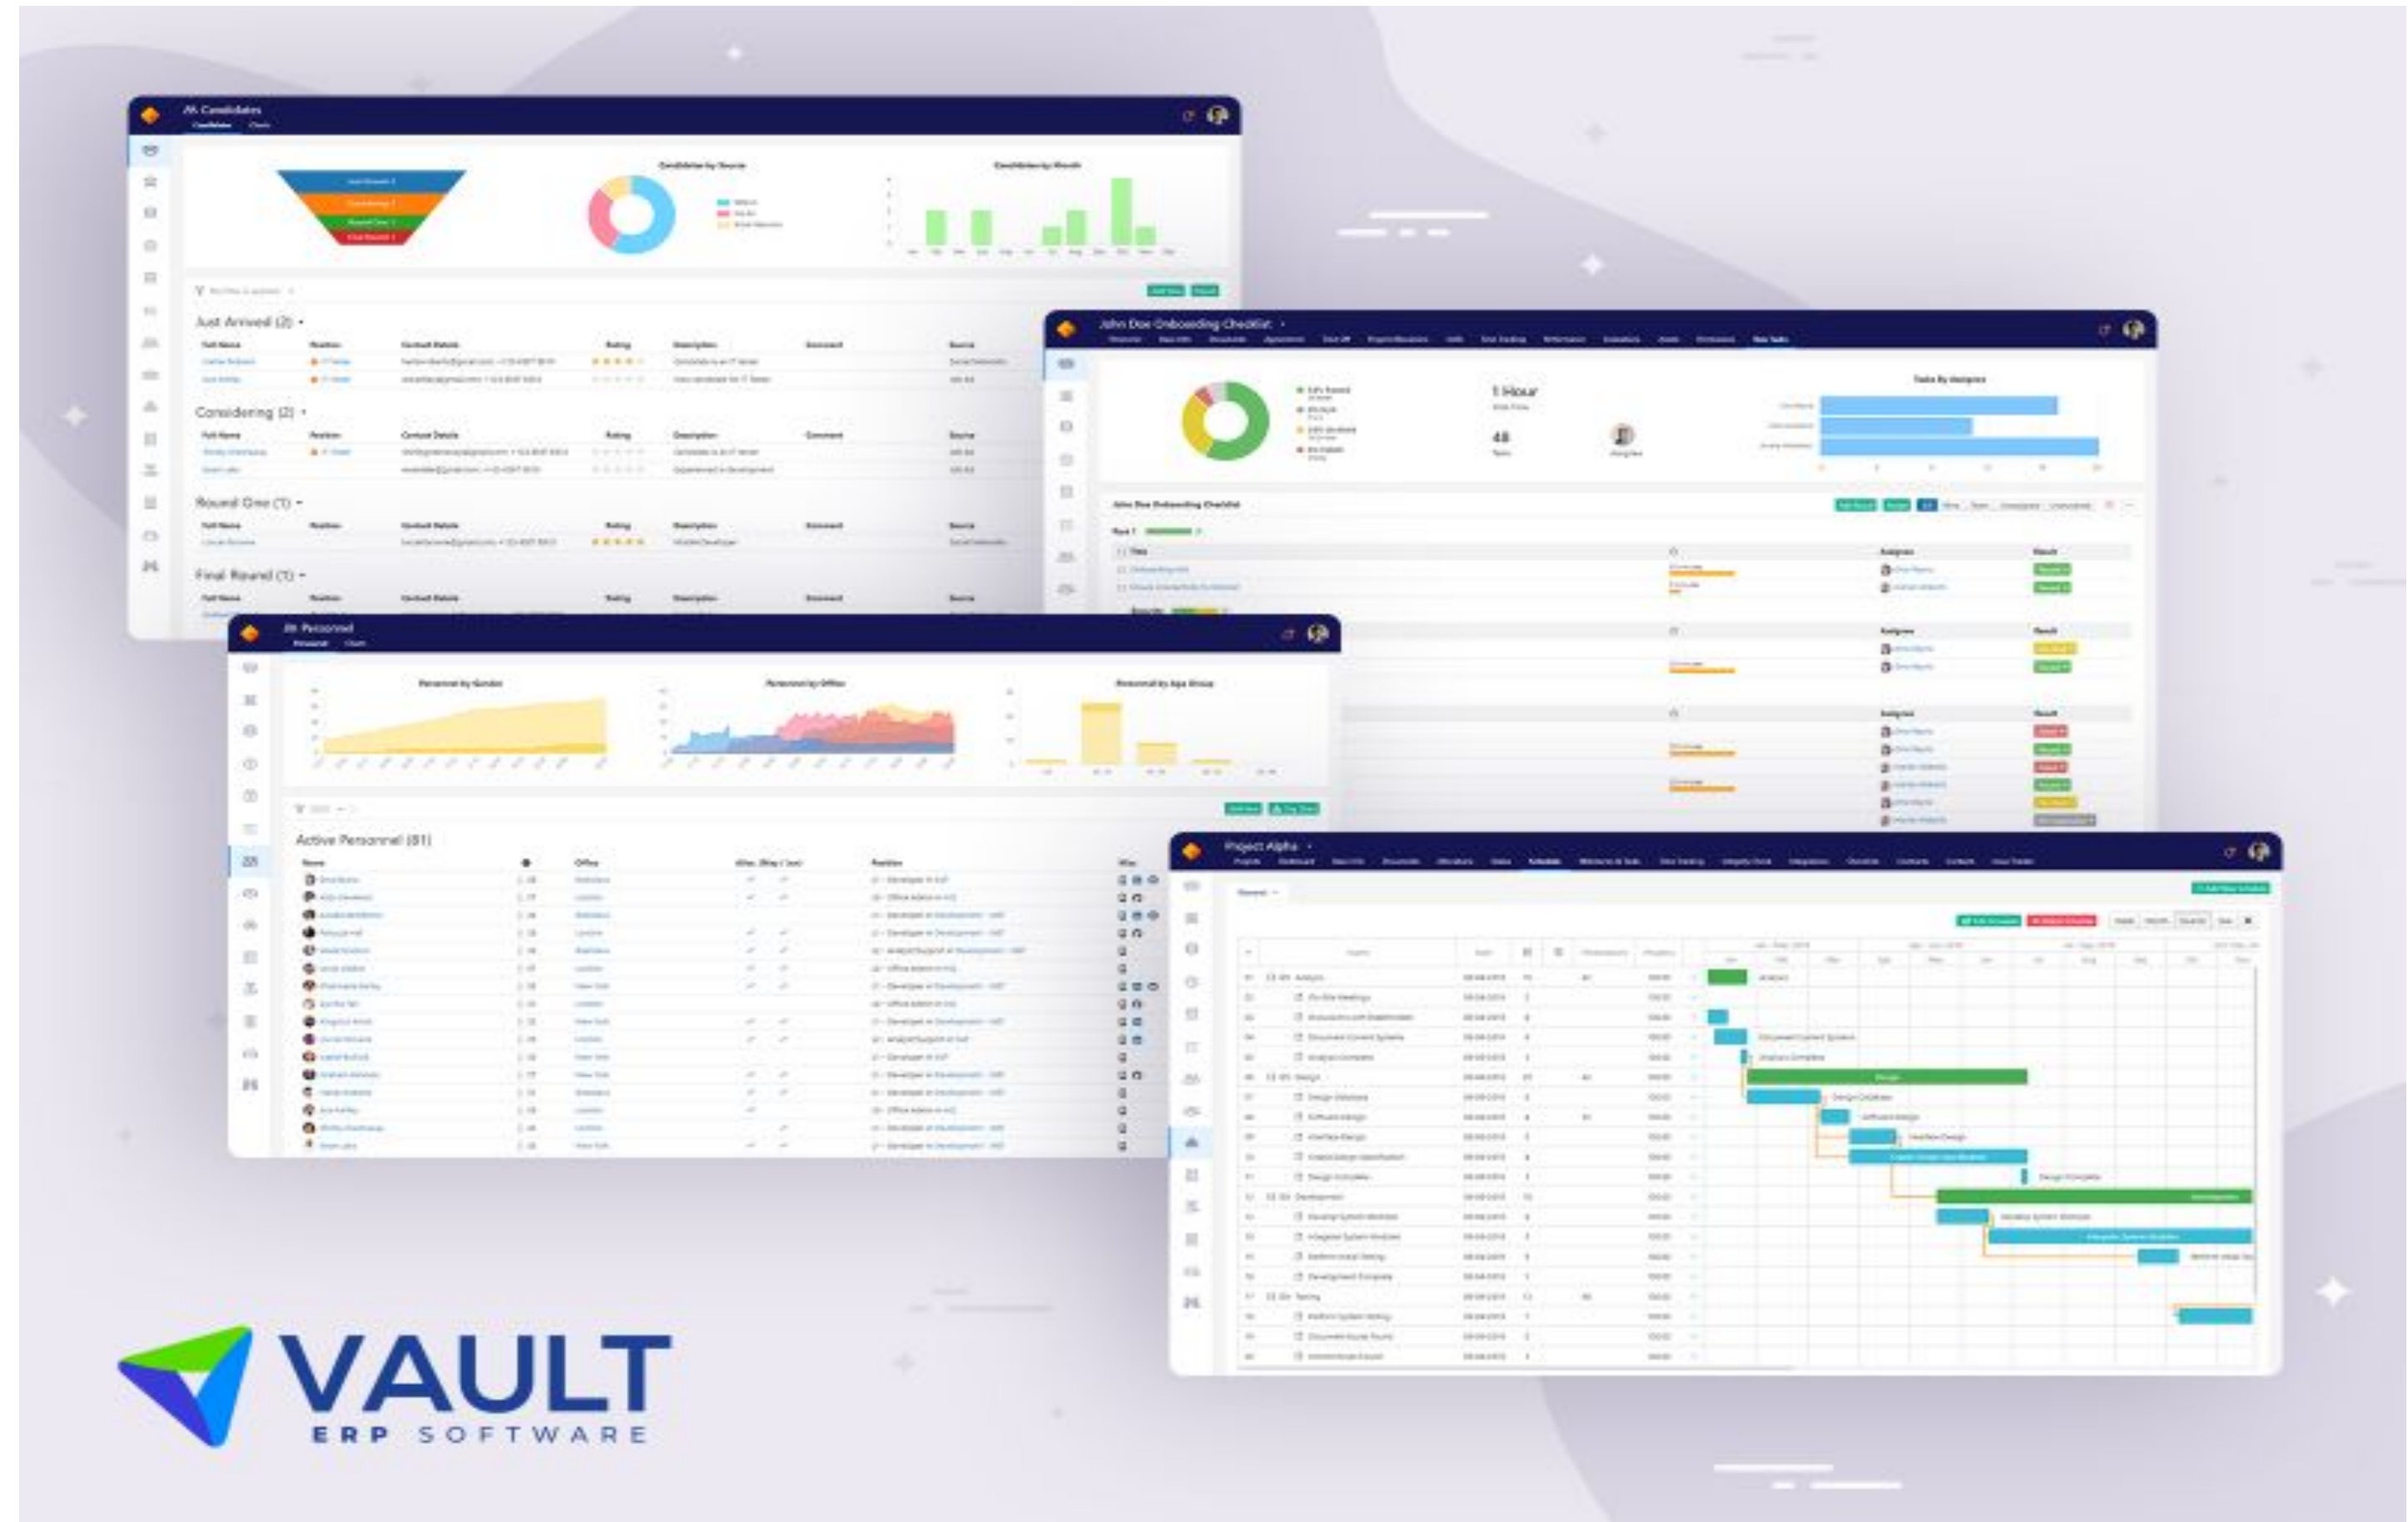

Device **OMNI BRIDGE**

Omni Bridge is a serverless Edge device that connects any networked printer to the cloud. When paired with the YSoft OMNI UP365 App, the first of our OMNI Apps, your printers can take advantage of Universal Print and, in the future, a variety of print and printer related features. OMNI Bridge is easily configurable in seconds and requires no maintenance.

Software VAULT ERP

Vault-ERP is a cloud-based resource planning software, which can help to manage your business in a different variety of industries. With this one tool you can increase productivity and efficiency and get a real-time overview of key company data.
